UNITED STATES GOVERNMENT

# memorandum

DATE: 04 October 1990

REPLY TO:  
ATTN OF: DT-S

SUBJECT: SUN STREAK Report 90103 (U)

TO: DT-5 [REDACTED] SG1J  
DT [REDACTED]

1. (S/STD/SK/NF) On 03 October, 1990 four remote viewers (018, 025, 049, 052) conducted a total of one SOLO and three CRV sessions in an effort to determine the location and status of the

SG1A

[REDACTED]

- a. What is the vessel's precise current location?
- b. Has the vessel sunk or sustained damage to prevent it from calling in?
- c. If so, did survivors abandon the vessel in life rafts?
- d. If so, where are the life rafts located?
- e. If the vessel is not in danger, why has it not reported its position?

SG1A

2. (S/STD/SK/NF) Viewer 018 reported that the [REDACTED] is presently located at 1530 S/9030 W, proceeding in a northwesterly direction at normal speed. The vessel is heading toward its original destination. The vessel is not presently in danger. The people on board are busy and happy, except for one person who is very sick. The vessel has not reported in because the ship's radio has a strange white "corrosion" (more like a fungus growth) inside one of its main plugs. The sick person is the one who knows enough about the equipment to find and fix the problem. Results of 018's session is at TAB A.

~~SECRET//NF//STD~~

SG1A

3. (S/STD/SK/NF) Viewer 025 reported that the [REDACTED] did sustain damage. It is presently (03 1500L Oct 90) located at 31 S/79 W. Some of the survivors/passengers are in "little boats" headed for the lower coast of Chile. Results of 025's session is at TAB B.

SG1A

4. (S/STD/SK/NF) Viewer 049 reported that the [REDACTED] is currently (03 1630L Oct 90) located at 2740 S/8155 W. The vessel is dangerously low in the water. The seas are becoming heavier and the vessel is barely keeping its nose above water. There are portions of the vessel which are missing, e.g., the integrity of the vessel is incomplete. There was a small fire (with an associated smell of ozone) which was caused by a piece of metal hitting against a group of curving tube shaped objects. The fire itself was small and did not spread vessel-wide. However, this fire is linked to the current condition of the vessel. The vessel can move forward but is drifting to the side, causing its course to be at an angle rather than straight ahead. The vessel will not be able to maneuver at all if the seas become any heavier. There are 7-8 individuals on board. Results of 049's viewing effort are at TAB C.

SG1A

5. (S/STD/SK/NF) Viewer 052 reported that the [REDACTED] is currently located at 3550 S/8515 W. Its survivors are currently located at 3330 S/8120 W, just north of Archipelago Juan Fernandez. The vessel did not sink, but all on board did abandon the vessel for a life raft. The people are currently all together. Results of 052's session are at TAB D.

6. (S/STD/SK/NF) Results were transmitted via STU-III secure channels to ODCSINT, DAMI-PO, on 031630L Oct 90.

SUMMARY OF INFORMATION

The target is a fair-sized ship in open water. It is presently located at 1530S/9030W, proceeding in a northwesterly direction at normal speed. The vessel is heading toward its original destination.

The vessel is not presently in danger. The people on board are busy and happy, except for one person who is very sick.

The vessel has not reported in because the ship's radio has a strange white "corrosion" (more like a fungus growth) inside one of its main plugs. The sick person is the one who knows enough about the equipment to find and fix the problem.

## Summary of Information

The target is currently located at 27 40 S 81 55 W. The vessel is setting dangerously low in the water as if it had been overloaded. The seas are becoming heavier and the vessel is barely "keeping its nose above water" right now. There are portions of the vessel which are missing; in other words, the integrity of the vessel is incomplete. There was a small fire with an associated smell of ozone nearby. It was caused by a piece of metal which was thumping/hitting against a group of curving tube-shaped objects. The fire itself was small and did not spread vessel-wide. However, this fire is linked to the current condition of the vessel. It can move forward but is drifting to the side, causing its course to be at an angle rather than straight ahead. It will not be able to maneuver at all if the seas become any heavier. There are 7 or 8 individuals on board. However, several of them seem distant or in a daze. One individual on the bridge is staring unfocused out towards the forward horizon. Two other individuals are sitting on the floor leaning against the wall. They also seem "incomplete". There are gaps not only throughout the ship but also within the people.
